Projects

MediaEverywhere

Adaptive Web Framework

 mediaeverywhere.com

MediaEverywhere is a development and deployment platform for mobile sites and apps focused on content and media companies.

Written in CoffeeScript, made beautiful using Stylus and rendered by most browsers.

TaskAware

iOS Universal Application

 task-aware.com

Location triggered task reminder application

Concept, design and implementation all done as a pet project.

Ripple Mobile Emulator

Chrome Extension

 github.com/blackberry/ripple-ui

A cross-platform, mobile web application emulation environment.

Open sourced and available on GitHub.
